■ TEXTURED CERAMIC VINYL FLOORING STYLES

Black

Slate Grey

White

White-10 Ceramic Gloss

Our White-10 Ceramic Gloss has the texture of an orange, and is also available in black and grey.

The texture helps deflect light, which helps hide scuffing. It's also available in a satin (less shiny) finish, but the less gloss applied means that the floor will be harder to clean.

We don't sell smooth white or smooth black as it has had too many defects in the past.

Reusable cardboard tubes with endcaps are also available.

Cleaning: This is very important, as this product should only be cleaned with water (no cleaners as they can make the floor sticky) and for a stubborn scuff you can use a magic eraser or tennis ball. You can use a dry Swiffer head with water to clean off dust and loose dirt. Remember to always cover your rollable vinyl with reinforced visqueen during installation.

*Remember to always save the cardboard core that the vinyl is wrapped on for post show shipping and storage.
